PW Kiyokazu is a total black Wagyu bull. After Kikuhana and Asayake Shinnen was it not easy to find an outcross and pure Wagyu bull. Certainly with the narrow bloodlines within this breed.

For this reason we are delighted with Kiyokazu, an outcross pedigree. This breed is worldwide known for its unique taste of meat and the big part of unsaturated fatty acids in the fat formation. The meat of the Wagyu's brings the cholesterol down. Kiyokazu is the second bull of K.I. Samen.

Kiyokazu is suitable for crossbreeding and gives light calves that are born easily.
